

## FUTURE-PROOF YOUR BUSINESS WITH HOSTED INFRASTRUCTURE

**TRUST KACO TO POWER YOUR NETWORK WITH CUTTING-EDGE TECHNOLOGIES AND EXPERT SUPPORT THAT DRIVES OPERATIONAL EXCELLENCE.**

*Relying solely on a physical on-site network setup can leave you vulnerable to downtime, security threats, scalability issues, and other risks. Instead, when you **outsource your infrastructure** to us, you'll successfully **maintain your productivity and defend your data**, no matter what comes your way.*

### STREAMLINE YOUR IT WITH OUR CUSTOM-FIT NETWORK HOSTING

**Kaco** offers a versatile hosting solution that unclutters your plate by taking on the work associated with hosting a network. That way, you can invest your time in more important tasks.

You'll be able to **be more agile, adapt quickly and boost efficiency** —while saving money through our **smart, dynamic resource allocation**. Our experts take a proactive approach at every step, deploying features that **minimize disruptions to your service**.

Whether you want everything or just certain parts of your environment hosted—like your firewall or data centers—**we're here to maximize your resources and keep your operations running smoothly.**

## TAILORED HOSTING SOLUTION WITH GLOBAL REACH

With us, you'll leverage a robust network architecture that provides **99.99% uptime, reduced application latency, and a higher throughput that reduces bandwidth costs.**

We partner with a leading provider that operates data centers worldwide, known for their **resilient platform, best-in-class features, and 5-layer security.** Kaco owns dedicated rack space within their servers, offering you the flexibility to purchase just the right amount —a single rack unit or an entire rack—**suited for your specific needs, budget, and operational requirements.**

You can scale without overhauling your infrastructure or moving to a new facility, leveraging a **pay-as-you-grow, consumption-based billing to align expenses with your actual usage.**

## MODERNIZING NETWORK AND SECURITY INFRASTRUCTURE WITH VIRTUALIZATION

Ready to streamline your operations? Not only will you confidently **connect remote teams to your network without sacrificing security or performance,** you'll **easily manage and scale your applications** and protective measures within minutes, not months, and without expensive hardware investments. We also give you **greater control over your network** so you can make responsive adjustments to meet shifting business needs.

## REDUNDANT INTERNET ACCESS FOR UNINTERRUPTED CONNECTIVITY

When almost all your operations occur online, you need a reliable connection to maintain your workflow. Our hosted solution **distributes your internet traffic so your network optimizes bandwidth use while minimizing costs,** and you can always access your applications at peak form. We also use a range of strategies to **monitor and maintain your connection's performance around the clock,** so your business never misses a beat.

## RELIABLE VPN FOR SECURE CONNECTIVITY

Say goodbye to managing your own remote work connectivity! We handle the burden of hosting your VPN appliance to ensure your employees can connect reliably when working outside the office. Our specialists will calibrate your connection to reflect your unique workplace requirements, **providing ongoing support and regularly tracking usage to maintain seamless network activity.** We also implement **sophisticated defense mechanisms and access control,** so you don't compromise on security.
