KACO SYSTEMS

DREAM BIG.
WE BUILD THE NETWORK TO GET YOU THERE.

At **Kaco Systems**, we don't just solve IT problems—we bring bold ideas to life. Just like an architect designs the framework that keeps a building standing strong, our team is here to construct a stable foundation that enables **continuous connectivity.** With our **sophisticated solutions working invisibly in the background**, you won't even have to think about your network functioning well; you can simply focus on confidently achieving your goals.

TALK TO EXPERTS FROM DAY ONE

Get access to the experts right away. With Kaco, you'll **work directly with network specialists who understand your challenges** and jump directly into crafting and implementing **individualized network strategies**. Let us be your dependable navigator on the road to business success.

WHAT WE DO

We design custom networks that fit your business like a glove. By leveraging our trusted partnerships and expertise in **infrastructure, cloud, cybersecurity and beyond**, we put measures into action that **keep your operations running smoothly.**

INFRASTRUCTURE STRATEGY & PLANNING

Tired of connectivity issues or frequent outages leading to stress and lost productivity? You need a solid network—and that starts with a plan. First, we conduct **thorough network, Wi-Fi, and cybersecurity assessments** to find the gaps in your current setup. Then, we will help you understand your environment in our **whiteboarding sessions**, where we'll set performance baselines together. Using the information that comes from these conversations, we **roadmap your next moves**. By engaging in significant upfront work to get to know your needs, we can advise you on creating and maintaining an infrastructure that's **ready to scale and perform at its best.**

INFRASTRUCTURE DELIVERY

Once your strategy is set, we get to work fast. Our team covers everything from **custom network design to integrating cloud connectivity and optimizing routing, switching, and SD-WAN.** We also secure your perimeter using **next generation firewall products** and **leverage SASE to maintain secure connectivity** for internet browsing and remote access to company resources.

HOSTED INFRASTRUCTURE

Say goodbye to time-consuming maintenance with our **flexible and reliable hosted solutions.** Our **secure VPN and private circuit termination** connect you seamlessly to any cloud environment, while our **scalable virtualized network** and cybersecurity infrastructure make it easier to manage your telecom portals and circuits. Through **24/7 monitoring** and redundant internet access, you can consistently rely on systems that operate at peak performance and availability.

MANAGED INFRASTRUCTURE SERVICES

Enjoy a stable and optimal network infrastructure with our comprehensive **IT/OT network and Wi-Fi management services**, which provide **full-service support** for IT and operational technology environments. Our **24/7 alerting and reporting** give you real-time insights into your network, while our **hybrid cloud management support** — from your servers and virtualization needs to your portals and circuits for provisioning and resource handling —lets you rely on systems that can be scalable and efficient as your business grows.

CYBERSECURITY SOLUTIONS

Kaco's comprehensive cybersecurity approach safeguards your business from evolving threats. We conduct **rigorous penetration testing** to identify vulnerabilities and **implement targeted solutions.** Our **advanced firewall and endpoint protection** secure your devices and networks, while **AI-powered threat detection and incident response** proactively monitor for risks and swiftly neutralize threats. To enhance your team's cybersecurity awareness, we also offer **realistic phishing simulations.**
