

NURTURE YOUR GROWTH WITH HIGH-QUALITY

NETWORK INFRASTRUCTURE STRATEGY & PLANNING

Rely on nimble specialists who are ready to effectively plan a secure foundation for your best work.

TAILORED IT SOLUTIONS FOR YOUR UNIQUE NEEDS

If you're used to struggling with headaches from using a network infrastructure built with outdated technology, Kaco is here to be your breath of fresh air. No more working with IT providers who lead with an all-or-nothing attitude! Our expert team will design a tailored network infrastructure that lifts your business to a new level of success.

BENEFIT FROM PROACTIVE, FLEXIBLE PLANNING PARTNERS

Kaco's specialists focus on taking the most effective actions to minimize your risk of a crisis—while ensuring you **stay in control of your network**.

Whether you want a complete overhaul or a targeted upgrade, we'll help you achieve your goal in whatever way suits you. Our experts can extend robust and secure connectivity through even the most dispersed and challenging environments—from designing and supporting connectivity from your remote sites and assets to tracking devices as they move throughout your environment.

Every situation is unique. That's why we take a comprehensive approach to understanding your environment, so we can deliver the results you need—no matter the scope or complexity.

▶ WHITEBOARDING SESSION

Before we begin an official partnership, we offer a free, informal collaborative **whiteboarding session** to get to know your environment by consulting with you—the expert on your business. Together, we **brainstorm potential solutions** to your technology challenges and engage in in-depth **contingency planning** to build a strategy that proactively addresses possible risks and aligns with your goals right from the start.

▶ NETWORK ASSESSMENT

Tailored to your unique perspective and goals, our comprehensive network assessment identifies your strengths, vulnerabilities, and opportunities to optimize performance and costs. We thoroughly evaluate your infrastructure - from hardware and software to traffic patterns, device configurations, and compliance - to pinpoint what's needed for **reliable, high-performing connectivity**.

Once we establish your new network performance standard through infrastructure baselining, we engage in detailed capacity planning to forecast the resources required for sustained success.

▶ STRATEGY AND ROADMAP EXERCISES

Once we have actionable insights, we conduct formal roadmapping to determine your desired end-user experience. Our specialists work closely with you to craft a personalized connectivity strategy that leverages best practices and meets your current and future needs. Whether it's developing a comprehensive backup and disaster recovery plan or determining network traffic priorities, we'll guide you in migrating to a more dependable and modern network setup.

Elevate your network, elevate your business

You need a network you can rely on to power your operations. We'll secure your connectivity and minimize risks, so you maintain control over your environment. With Kaco as your partner, you can start unlocking new possibilities for your business.
